Stand Construction for Trade Fairs and Exhibitions

Custom Stand Construction

Does your company have particular qualities? Then make people aware of them with a custom exhibition stand. Perfectly planned, well built, and finished on time, right where you need it. With everything you could possibly need, including kitchen and lighting. With exemplary functionality and an excellent design. You haven't yet decided what you need? We can provide customised support. To suit all budgets. **That's a promise.**

Construction System

Who says that you can't achieve great results on a low budget? The setCubed construction system is anything but ordinary. And we can prove it to you by designing a stand to your exact specifications from our pre-manufactured modules. We can also design a favourably priced mix of system modules and individual components just for you. Tell us what your budget is and we will make the very best of it. **With a turnkey design.**

Shopfitting

A shop must be able to sell. Your customers are sensitive to first impressions and the attractiveness of the products' presentation. You devote your attention to practicability and a CD-compliant design.

We take all of this into account. And a whole lot more, when we advise you, recommend specialists from our network of contacts, and implement the final, sensational scenario with masterful skill. Complete, from the shop counter to the light fittings. **Quite illuminating.**
